REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Application has a single independent claim which has limitation of the switching circuit includes a switching element which is connected between the output terminal and the reference potential terminal, applies a current to the primary coil of the ignition coil in an on state, and interrupts the current of the primary coil when an off state is caused, a drive resistor for the switching element, a current supply circuit which is connected between the input terminal and the reference potential terminal and supplies a driving current to the drive resistor, and a waveform shaping circuit which controls the driving current from the current supply circuit to the drive resistor, brings the switching element into the on state on the basis of supply start of the driving current, and brings the switching element into the off state on the basis of supply interruption of the driving current, and the waveform shaping circuit includes a comparison signal generation circuit for generating a comparison signal on the basis of the ignition signal voltage, and a reference signal generation circuit for generating a reference signal on the basis of the ignition signal voltage, starts to supply the driving current to the drive resistor when the comparison signal becomes larger than the reference signal in the rising portion of the ignition signal voltage, and interrupts the driving current when the comparison signal becomes smaller than the reference signal in the falling portion of the ignition signal voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4, and 7-18, directed to the other species are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

3. In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no
